3D LENTICULAR

Now new dimensions can be added to your printing communication, to enhance the beauty and effect of advertisements, interiors and photographs, as lenticular printing brings pictures closest to the look of the original objects, making them most charming and visually appealing. In terms of colour, sharpness and depth.

The first step in this 3D Lenticular medium is to choose the Lenticular effect that best suits your graphic or the message you are trying to communicate.

Lenticular printing is a process or combination of two or more images viewed by a specialized lens material to create the illusion of animation or three-dimension.

VM SHOP WINDOW

Visual Merchandising is the art of displaying merchandise in a manner that is appealing to the eyes of the customer. It sets the context of the merchandise in an aesthetically pleasing fashion, presenting them in a way that would convert the window shoppers into prospects and ultimately buyers of the product. A creative and talented retailer can use this upcoming art to breathe in new life into his store products. Passion for design and creativity are essential to be a good visual merchandiser. A perfect design process and the ability to create ideas that are different are required. Awareness of happenings in fashion world is needed so as to keep up-to-date with the dynamics of the market constantly.

Visual merchandising includes window displays, signs, interior displays, cosmetic promotions and any other special sales promotions taking place.
